STANDARD SPECIFICATION FOR Female SCART Mounting Screw Location

2025-02-01
CONFORMITY RECOGNIZED BY
KYTOR TESTING LABORATORIES

Two mounting locations shall be provided adjacent to the female SCART port to prevent unintended disconnection. Each location shall be female-threaded and flush or recessed in accordance with the dimensions below.

Self-tapping plastic threads do not meet the intent of this specification and are not permitted.

This specification is an adoption of the original design by Dr. Mike Chi.

Mounts may consist of board mounted PEM SMTRAM4-9-7, plastic enclosure (shell) mounted heat insert nut, or equivalent alternate at the designer's discretion.

Dimensions are in millimeters.
